

Adjustable elbows for trapezoidal cable trays

Overview

The flexible elbow for FTE50 cable trays in FRP material makes it easy to create horizontal direction changes on the tray's span. You simply form it by hand in any angle from 0-90°. In addition, it can be used to create side steps. There are covers available that fit all. A range of nearly twenty fittings makes the system customizable, accommodating any kind of tricky configuration. Users can achieve design flexibility with numerous sizes of horizontal and vertical elbows, adjustable elbows, cross pieces, tees, reducers, and branches. Q2:Can you provide customized services for special specifications?

F2:We can provide a variety of customized services, including but not only. with the same or different width of the cable run. The Snap Track system was designed and is intended to be used as a UL Classified continuous assembly of straight sections, fittings, and accessories used to form a structural support, for the purpose of supporting, protecting.
