

China-Africa Optical Cable Platform

Overview

The project aims to deliver high-speed and stable Internet connections to 33 countries by deploying advanced submarine optical cable technology.

Key Takeaways

China Mobile International (CMI) and seven global partners — Bayobab, center3, Meta, Orange, Telecom Egypt, Vodafone Group, and WIOCC — completed the core 2Africa submarine cable system, creating a continuous east-west link around Africa within a single system. The launch of 2Africa enables us to offer our customers seamless connection between Africa and Europe, together with our SEA-ME-WE 5 and AAE-1 subsea cable resources to further extend to Asia, which is an important milestone of our global development strategy,” said Jessica Gu, Director & Chief. The 2Africa project is a collaboration between China Mobile and several international telecom operators, including Meta (formerly Facebook), Vodafone, Orange, Center3 (formerly STC), Bayobab (formerly MTN), WIOCC, and Telecom Egypt. This cross-continental submarine optical cable project covers. 2Africa is an international submarine telecommunications cable that interconnects Africa and further connects Asia and Europe. It passes from Europe through the Atlantic Ocean and Indian Ocean, and then back into Europe via the Red Sea and the Mediterranean Sea. Stretching more than 45,000 km and. Nairobi- Kenya and China have made a breakthrough in digital infrastructure cooperation, as they officially activated the eastern segment of the 2Africa submarine cable in Nairobi on Friday, 7 November 2025. In a ceremony attended by senior Kenyan government officials, Chinese diplomats and.
