

Explosion-proof electrical distribution boxes in Mauritius

Overview

Distribution Boxes in Mauritius | Breaker Enclosures – Shop high-quality distribution boxes and enclosures for circuit breakers at Electrical.mu. Designed.

Key Takeaways

Explosion-proof distribution boxes in Mauritius are available with IECEx and ATEX certifications, suitable for hazardous zones, and can be sourced from specialized suppliers.

Explosion-proof electrical distribution boxes, also known as Ex terminal or junction boxes, are designed to safely connect and distribute electrical circuits in environments where explosive gases or dust may be present. These enclosures contain sparks or heat generated by electrical connections, preventing ignition of the surrounding atmosphere, and are essential for industrial safety in hazardous areas .

Certifications and Standards

- ATEX: European directive for equipment in explosive atmospheres.
- IECEx: International standard for global compliance.
- Certified for Zone 1 & Zone 2 (explosive gases) and Zone 21 & Zone 22 (combustible dust) environments .

Materials and Features

Explosion-proof boxes are made from durable materials to withstand harsh conditions:

- Glass-Reinforced Polyester (GRP): Lightweight, corrosion-resistant, suitable for general industrial use.
- Stainless Steel (AISI 304 / 316L): Highly resistant to corrosion, ideal for offshore, marine, and chemical environments.
- Aluminum: Balanced durability and weight, suitable for indoor and outdoor installations. Key features include high ingress protection (IP65/66 or higher), wide temperature tolerance, and robust construction to ensure safety in extreme conditions .

Suppliers and Availability in Mauritius

While general distribution boxes are widely available from local suppliers such as Electrical.mu and Legrand Mauritius, specialized explosion-proof enclosures can be sourced from international suppliers like Hexlon and MLX-EX, which provide certified products suitable for hazardous zones . Local distributors may assist with importation, installation guidance, and compliance with safety regulations.

Applications

Explosion-proof distribution boxes are commonly used in:

- Chemical plants
- Oil and gas facilities
- Offshore platforms
- Industrial manufacturing areas with flammable gases or dust

Conclusion

For industrial projects in Mauritius requiring hazardous area compliance, explosion-proof distribution boxes with IECEx and ATEX certifications are essential. They are available through specialized suppliers and can be integrated into both indoor and outdoor installations, ensuring safety and regulatory compliance .
