

Fiber optic cable longitudinal breakage sleeve

Overview

U-TECK's Fiber Optic Protector Sleeves were developed to protect and strengthen fusion splices on fiber cables.

Key Takeaways

A fiber optic splice sleeve is a protective device that encases a fusion splice, providing mechanical strength and environmental protection to prevent breakage and signal loss.

Purpose and Function
A fiber optic splice sleeve is designed to protect the fragile joint created when two optical fibers are fused together. After fusion splicing, the exposed glass is extremely delicate and susceptible to mechanical stress, moisture, dust, and other environmental factors. The sleeve restores the mechanical integrity of the fiber, prevents microbends or breaks, and ensures long-term signal stability and network reliability.

Structure

A standard fiber optic splice sleeve typically consists of three main components:

- **Outer Heat-Shrink Tube:** Made from high-quality polyolefin, it shrinks uniformly when heated to tightly encapsulate the inner components.
- **Inner Hot-Melt Adhesive Layer:** Bonds the fiber and sleeve components during heat shrinking, creating a waterproof and airtight seal.

- **Stainless Steel or Ceramic Strength Member:** Provides rigidity and prevents bending or breakage at the splice point .

Installation Process

- Slide the sleeve onto the fiber before performing the fusion splice .
- Perform the fusion splice using a fusion splicer to align and melt the fiber ends.
- Slide the sleeve over the splice to cover the joint.
- Heat the sleeve using a sleeve oven (often integrated into the fusion splicer) to shrink the outer tube and activate the adhesive, forming a rigid, protective seal .

Applications

Fiber optic splice sleeves are widely used in:

- FTTH and FTTx deployments
- Backbone and metro networks
- Data centers and LAN infrastructure
- Any permanent fusion splice installation where long-term durability is critical .

Benefits

- **Mechanical Protection:** Prevents fiber breakage and microbends.
- **Environmental Protection:** Shields the splice from moisture, dust, and temperature fluctuations.
- **Signal Integrity:** Maintains low attenuation and prevents network outages.
- **Ease of Installation:** Compatible with standard fusion splicer ovens and allows high-density installation in splice trays . Investing in high-quality fiber optic splice sleeves ensures long-term network reliability, reduces maintenance costs, and protects critical optical connections from longitudinal breakage.

Fiber Optic Cable Splice Sleeves | Fiber Optic Cable Tools | Budco ...

Since 1970, Budco has provide cable construction tools, cable installation tools, and cable identification tools including fiber optic test

Fiber Optic Splice Protection Sleeves & Heat Shrink Tubing

Our buyer''s guide breaks down sleeve sizes, single vs. double needle FTTH sleeves, sleeve-vs-box-vs-ceramic, and the quality

Splice Sleeves – FiberOptics

Fiber Optic products. We carry Fiber Optic fusion splicers, cleavers, OTDRs, cables, panels, laser sources, power meters, and many

Splice Protection Sleeves | AFL Global

This easy and cost effective method is a great alternative to recoating. The FPS01 and FPS04 series offer a wide range of options to

Fiber Optic Protector Sleeve | U-TECK

U-TECK's Fiber Optic Protector Sleeves were developed to protect and strengthen fusion splices on fiber cables. The construction of

Fiber Optic Cable Protection Sleeve

This page contains our fiber optic cable protection sleeve products. We offer packs of 45mm and 60mm optic fiber protection sleeves

The FOA Reference For Fiber Optics -Mechanical Splices

Prepare the cables to be spliced (VHO on cable preparation) Strip jacket, removing an adequate amount of jacket, usually 2-3 m, for

Fiber Splice Protection Sleeves

The ribbon fiber optic splice protection sleeves use ceramic components as the strengthen member, the whole splice sleeve typical

Fiber Optic Splice Protection Sleeves: Sizes, Types & How to Choose ...

A fiber optic splice protection sleeve is a heat-shrink tube that seals and reinforces a fusion splice. Get the type or size

Fiber Optic Cable and Splice Closure Solutions | Corning

Corning offers optimized pairings of fiber closures and cable types to help you decide what's essential to your network's set up.

Fiber Splice Tray & Protection Sleeves

Fiber Splice Tray & Protection Sleeves ensure 100% protection & cable management for fusion and mechanical splicing, holding up

Heat Shrink Fiber Fusion Splice Protection Sleeves

Steel or all-dielectric heat shrink sleeves by Corning, Raychem, Mooseline. Single or ribbon fiber splices. 1.5, 2.0, 3.0mm in

Ribbon Fiber Protection Sleeve 6 & 12 Fibers: A Sourcing Guide

What Is a Fiber Protection Sleeve? A fiber protection sleeve is a heat-shrinkable tube that encases and protects optical

Optical Fiber: How to Install Splice Protection Sleeve

How to correctly install the splice protection sleeve after the Fiber Fusion splicing. A spliced bare fiber is very fragile.
