

How much does a fiber optic splice closure usually cost

Overview

Fiber Optic Splicing Cost Per Splice (2025 Guide) Fiber optic splicing costs vary widely depending on project size, location, fiber type, and site condition.

Key Takeaways

Fiber optic splice closures typically range from \$80 to \$300 per unit, depending on type, capacity, and application. Price Overview

Fiber optic splice closures (FOSCs) are protective enclosures for spliced fiber optic cables. Prices vary based on closure type, fiber capacity, and environmental rating:

- Dome closures (vertical type) for outdoor or buried applications, such as the 96-core dome closure (GJS-D001), are commonly priced around \$80–\$150 per unit for standard models, with higher-end or bulk orders potentially lower per unit .
- Inline or horizontal closures for wall-mounting or duct applications may fall in a similar range but can go higher depending on fiber count and sealing type .
- High-capacity closures (up to 672 fibers) or IP68 waterproof-rated closures may cost \$200–\$300 per unit due to enhanced mechanical strength and environmental protection .

Factors Affecting Price

- Fiber Capacity: Closures with higher fiber counts (e.g., 144, 288, or 672 fibers) are more expensive due to larger trays and more complex internal organization .

- **Application Type:** Aerial, underground, wall-mount, or handhole installations influence material and sealing requirements, affecting cost .
 - **Waterproofing and Sealing:** Heat-shrinkable or mechanical seals with IP68 ratings increase durability and price .
 - **Bulk Orders:** Wholesale purchases can reduce per-unit cost significantly, especially for factory-direct suppliers .
 - **Additional Materials:** Splice trays, enclosures, and protective sleeves are often billed separately from labor, which can add \$80-\$300 per closure .
- Practical Considerations**
- For commercial projects, closures are usually purchased in bulk, and contractors may quote per-splice rates separately from closure costs.
 - Always confirm whether the quoted price includes installation materials or is for the closure only.
 - Prices may vary by vendor and location, so checking multiple suppliers, including online wholesale platforms and local distributors, is recommended . In summary, expect to pay \$80-\$300 per fiber optic splice closure, with the exact price depending on fiber count, type, environmental protection, and purchase volume.
