

How to install a curtain to shield the distribution box

Overview

Use A Simple Curtain Trick To Cover The Eyesore Of No need to bust out the carpentry tools when you need to cover up the sight of an electrical How to Hide.

Key Takeaways

You can conceal a distribution box safely by hanging a fire-resistant curtain on a movable track, ensuring accessibility, ventilation, and compliance with electrical codes. Step 1: Choose the Right Curtain

Select a fire-resistant or flame-retardant fabric, ideally tested to NFPA 701 standards, to reduce fire risk near electrical equipment . The curtain should be larger than the distribution box to avoid interference with the panel door and allow easy access when needed . Lightweight fabrics are easier to handle, but for industrial or high-traffic areas, consider heavy-duty vinyl or padded curtains for durability .

Step 2: Select a Mounting Mechanism

Curtains can be mounted using:

- Traverse or wrap-around rods for easy sliding
- Swing-out arms to move the curtain completely aside

- Ceiling or wall-mounted tracks depending on available space Ensure the track allows the curtain to fully clear the distribution box when accessing breakers or performing maintenance.

Step 3: Maintain Safety and Accessibility

- Keep the curtain away from the breaker door to prevent obstruction .
- Ensure adequate ventilation around the box to prevent heat buildup .
- Avoid placing the curtain near flammable materials like clothes or paper .
- Follow manufacturer guidelines for the distribution box and comply with local electrical codes .

Step 4: Installation Procedure

- Measure the area around the distribution box to determine curtain size and track length.
- Mark mounting points on the wall or ceiling, ensuring the track is level.
- Install the track or rod securely using screws or bolts suitable for the wall/ceiling material.
- Attach the curtain using hooks, rings, or clips compatible with the track system.
- Test movement to ensure the curtain slides or swings freely without touching the box.

Step 5: Optional Enhancements

- Use modular or double-layer curtains for additional shielding or aesthetic purposes .
 - Consider RF/EMI shielding curtains if the distribution box is in a sensitive electronic environment .
 - Label the curtain or area to indicate the presence of electrical equipment for safety.
- By following these steps, you can effectively conceal a distribution box while maintaining safety, accessibility, and compliance with electrical standards.
