

Ireland Outdoor Male Connector Anti-Signaling

Overview

Connectors – Mouser Ireland Connectors are in stock with same-day shipping at Mouser from industry leading manufacturers. Mouser is an authorized distributor.

Key Takeaways

The N-Male crimp connector for LMR 400 coaxial cable is a reliable outdoor male connector suitable for signal-boosting setups in Ireland.

For outdoor mobile signal or RF applications, N-Male connectors are widely used to connect antennas, splitters, amplifiers, and coaxial cables. They are compatible with LMR 400 coaxial cables, which are standard for high-frequency signal transmission, including 2G, 3G, 4G, and 5G networks in Ireland. These connectors are designed to maintain signal integrity and minimize loss, making them ideal for anti-signaling or signal-boosting setups.

Features

- **Crimp Type:** Requires a crimping tool and prep kit for secure installation.
- **Durability:** Suitable for outdoor use, resistant to environmental factors.
- **Compatibility:** Works with all major Irish mobile carriers, including Vodafone, Eir, Three, Lyca, Tesco Mobile, and Virgin.
- **Applications:** Can be used for home, office, vehicle, or marine signal boosters.

Weatherproof Options

For extreme outdoor conditions, IP68-rated inline connectors are available. These 3-core weatherproof connectors are ideal for repairing or extending cables in outdoor or even underwater environments, ensuring reliable performance in harsh weather .

Installation Tips

- Cable Preparation: Use the prep tool to strip the LMR 400 cable correctly.
- Crimping: Secure the connector using a crimp tool to ensure a stable connection.
- Outdoor Protection: Consider additional weatherproofing or sealing if the connector is exposed to rain or moisture.

Where to Buy in Ireland

- Waveboosters Ireland: Offers N-Male crimp connectors and all necessary accessories for installation .
- New.ie: Stocks IP68 weatherproof inline connectors for outdoor and underwater use . These connectors provide a robust solution for outdoor signal boosting, ensuring minimal signal loss and reliable connectivity for mobile devices and RF equipment.
