

Is it okay to use Cisco for the core layer switch

Overview

The short answer is of course: it depends. According to Cisco the Catalyst 9200, 9300, and 9400 series switches are meant to be used as access switches, but could you use these as core switches?

The purpose of this article is to answer the question to, “Can I use Cisco Catalyst 9200 as core switches?

”. Routing Protocol at the Distribution Layer Computes Primary and Alternative Paths Redundant Layer 2 Links to Provide Resilience Redundant Component to Avoid Network Outages in Case of a Device Failure Routing Protocol at the Distribution Layer Computes Primary and Alternative Paths Redundant Layer. Should I use L2 Managed Switch or L3 Switch for Core Layer in our Headquarters Network Setup?

Hi, a new Jr Network Specialist here. I just want to ask for some advice if whether we should use a L3 Switch in the Core Layer or a L2 Managed Switch is enough?

Our company has 200-250 devices connected. A Cisco core switch is a high-capacity switch that serves as the gateway to a wide area network (WAN). In this case, the word “core” is referring to the switch's position in the networking infrastructure. It's part of the physical core of the network, also known as the backbone of the switching. In a three-layer hierarchical model for Cisco routers, The first layer is the local area network (LAN) that uses IEEE 802. This low level of networking provides easy sharing of media and files between individual.
