

Overseas warehouse network security equipment 400G

Overview

400G Network Tester Semight NTA4100 is specifically designed for high speed ethernet traffic test, which supports not just 400GE, but also other speeds as 200GE and 100GE.

Key Takeaways

Fortinet's FPX-400G, a high-performance network proxy appliance, delivers robust security and reliability. Featuring four GbE RJ45 ports, CP9 hardware acceleration, and 4TB storage, it's ideal for enterprises seeking efficient and secure web traffic management. PacketLight Networks offers a wide range of WDM (wavelength division multiplexing) and OTN (optical transport network) products, that support any mix of data, storage, video and TDM services including 10/40/100/400/800Gb Ethernet and 8/16/32/64G FC over dark fiber, WDM and OTN. PacketLight. 400G Technology is a critical tool for service providers and data center operators to meet the network capacity needs of a data-hungry world. VIAVI provides advanced test products for the lab and field to help the 400G ecosystem address this critical challenge. The FPX-400G ensures enhanced data. Proxy is a secure web gateway that protects employees against internet-borne attacks by incorporating multiple detection techniques such as web, video, and DNS filtering, data loss prevention, antivirus, intrusion prevention, and Client Browser Isolation. Powerful hardware that can perform SSL.
