

Price of Dustproof Combined Distribution Box

Overview

Shop our combined distribution boxes for reliable power management. Ideal for solar systems, industrial applications, and more.

Key Takeaways

Dustproof combined distribution boxes typically range from \$20 to \$150 per unit, depending on size, material, IP rating, and features.

The cost of a dustproof combined distribution box varies based on several factors:

- **Material:** Plastic (ABS, PVC, polycarbonate) boxes are generally more affordable, while metal enclosures (galvanized steel or aluminum) are more expensive due to durability and EMI/RFI shielding .
- **Protection Level:** IP-rated boxes, such as IP65, which are dustproof and waterproof, tend to cost more because of enhanced sealing and gaskets .
- **Size and Capacity:** Larger boxes with more circuits or built-in breakers increase the price .
- **Features:** Additional features like built-in circuit breakers, voltage/current displays, or smart monitoring can raise the cost .

Typical Pricing Examples

- Basic plastic dustproof distribution boxes: \$20–\$50 per unit for small indoor or light-duty applications .

- Industrial-grade combined boxes with IP65 protection: \$60–\$150 per unit, suitable for outdoor or harsh environments .

- Custom or OEM options: Prices vary widely depending on order volume, customization, and additional features; bulk orders can reduce per-unit cost .

Where to Buy

- Online marketplaces: Amazon, Alibaba, and Made-in-China offer a wide range of dustproof combined distribution boxes with varying specifications and prices .

- Industrial suppliers: Local electrical distributors or specialized industrial suppliers can provide tailored solutions and bulk pricing. When purchasing, ensure the box meets your IP rating requirements, voltage and current specifications, and environmental conditions to ensure safety and longevity.
