

Price of ceramic tile lining for distribution boxes

Overview

Wholesale ceramic tile pricing varies widely based on size, finish, quality, brand, and supplier terms.

Key Takeaways

The price of ceramic tile linings for distribution boxes varies widely depending on material type, tile size, thickness, and supplier, typically requiring a direct quote from manufacturers or distributors.

- **Material Composition:** High-alumina ceramic tiles (around 90% Al_2O_3) are more wear-resistant and durable, making them more expensive than standard ceramic tiles .
- **Tile Size and Thickness:** Larger or thicker tiles increase material costs and may require more adhesive or epoxy for installation .
- **Custom Shapes and Kits:** Custom-cut tiles or pre-assembled lining kits for specific distribution boxes can raise the price due to manufacturing complexity .
- **Quantity and Bulk Orders:** Purchasing in bulk often reduces the per-tile cost, while small orders may carry higher unit prices .

- Installation Materials: Adhesives, epoxy kits, or ceramic beads for bonding tiles to metal, concrete, or wood surfaces add to the overall cost .

Typical Suppliers

- Multotec: Offers high-alumina industrial ceramic linings for chutes, hoppers, and feeders, with custom shapes and sizes .

- LCDM: Provides ceramic tile liner kits for grain and material handling, including epoxy bonding kits and custom-cut tiles .

- Trelleborg: Supplies heavy-duty alumina ceramic tiles for high-abrasion applications, with technical support for selecting the right liner .

- CorroCeramic™: Focused on mining and mineral processing equipment, offering wear-resistant ceramic liners .

- Tilesbycontainer: B2B platform for bulk ceramic tile orders, which may include industrial-grade tiles suitable for lining applications .

Cost Estimation Approach

Since prices are not standardized, the best approach is to:

- Determine the dimensions and number of tiles required for your distribution box.
- Specify the material grade (e.g., high-alumina, wear-resistant).
- Contact suppliers for custom quotes, including shipping and installation materials.
- Compare quotes from multiple suppliers to ensure cost-effectiveness and quality. In general, industrial ceramic tiles for lining applications are more expensive than standard floor or wall tiles due to their wear resistance, durability, and custom manufacturing requirements. For accurate pricing, reaching out to suppliers like Multotec, LCDM, or Trelleborg with your specifications is recommended.
