

Tools for making your own optical cable hot stripper

Overview

Fiber Optic Cable Stripping Tools and Equipment Shop our fiber optic cable stripping tools, essential for removing cable jackets, aramid yarn, and buffers.

Key Takeaways

To make a functional optical cable hot stripper, you need precision heating elements, adjustable fiber holders, temperature control, and safety equipment to strip fiber coatings without damaging the glass core. Core Components and Tools

1. Heating Element: A small, controllable heating element is essential to soften or melt the fiber coating. Common options include ceramic heaters, nichrome wire, or PTC heating elements. The temperature must be adjustable to match the type of fiber coating (acrylate, PVC, or tight buffer) without damaging the glass fiber . 2. Fiber Holding Mechanism: You need a precise fiber clamp or groove system to hold the fiber in place while it passes through the heated zone. This ensures uniform stripping and prevents bending or breaking the fiber . 3. Temperature Control and Power Supply: A digital or analog temperature controller allows you to maintain a consistent heat level. A low-voltage DC power supply is often used to safely power the heating element . 4. Cutting and Stripping Tools: Even with heat, you may need mechanical tools for initial jacket removal or aramid (Kevlar) strength member cutting. This includes:

- Fiber optic jacket strippers for outer jackets (1.2–6.4 mm)

- Kevlar scissors or micro-serrated cutters for aramid yarn
 - 900 µm buffer strippers for tight buffer coatings
 - 5. Cleaning and Inspection Tools:
 - Lint-free wipes and 99.9% isopropyl alcohol for cleaning fiber ends
 - Fiber microscope to inspect stripped fibers for scratches or coating remnants
- Safety Equipment:

- Safety glasses with side shields to protect from flying shards
- Cut-resistant gloves or nitrile gloves to prevent punctures from fiber splinters
- Proper disposal containers for fiber shards

Optional Enhancements

- Adjustable guide rollers to feed fiber through the heated zone smoothly
- Timer or automated feed system for consistent strip lengths
- Insulated housing to prevent accidental burns

Summary

A DIY optical cable hot stripper combines controlled heat, precise fiber handling, and safety measures. While mechanical strippers can handle many fibers, a hot stripper is particularly useful for delicate coatings or high-volume stripping. Always prioritize temperature control and protective equipment to avoid damaging fibers or causing injury .

Fiber Optic Cable Stripping Tools and Equipment

Shop our fiber optic cable stripping tools, essential for removing cable jackets, aramid yarn, and buffers to ensure optimal fiber optic

Fiber Stripping Tools

Jonard Tools manufactures a large range of fiber optic stripping tools specifically designed for technicians in the fiber optics industry.

FiberShack

About this item **INDUSTRY PROVEN DESIGN:** Our Fiber Cable Stripping tool is field tested to deliver consistent performance. Ideal

Fiber-Optic Tools | McMaster-Carr

11 Pieces— 11-piece kits include a variety of tools to support a wide range of applications. Along with a standard wire cutter and wire

Fiber Optic Thermal Stripper for Ribbon or Fiber, Fast Heating Optical ...

□Widened Limit Blade□The optical fiber stripping tool is designed with widened limit blade for precise clearance control, it ensures

Sumitomo JR-6+ Thermal Stripper For Ribbon Or Single Fiber Stripping

The Sumitomo JR-6+ Thermal Stripper is a precision tool for fiber optic cable stripping. Designed for technicians, it ensures clean

Fiber Optic Drop Cable Stripper for FTTH Drop Cables ...

CFS-3 Fiber Optic Stripper Our Three hole Fiber stripping tool is field tested to deliver top performance on client sites. Ideal for use

Paladin Tools Fiber Optic Stripper, Drop Cable Fiber Stripper

Introducing the Paladin Tool TCDCS Fiber Optic Stripper by Tempo Communications. The Paladin TCDCS Fiber Stripper is a rugged

FTTH Assembly Optical Fiber Termination Tool Kit, 15pcs Fiber Optic ...

□PRACTICAL FTTH TOOL KIT□The 15pcs optic tester set including various tools, such as optical fibre cleaver, cable stripper,

Fibre Optic Cable Stripper | CK Tools

Fibre Optic Cable Stripper Fibre Optic Cable Stripper The Kabifix LK25 is the ideal tool to dismantle optical fibres and coaxial cables

Fiber Optic Thermal Stripper, Auto Heating Stripping Tool (US Plug ...

Efficient Fiber Optic Thermal Stripper for Professionals Enhance your fiber optic work with our versatile Fiber Optic Thermal Stripper.

Fiber Stripping Tools

Trusted since 1958, Jonard's Fiber Stripping Tool is a must-have for all fiber technicians. Shop Jonard's popular collection of fiber

Fiber Strippers – tools, mechanical, thermal, chemical, plasma,

The main types include mechanical handheld tools with precise blades, thermo-mechanical strippers that use heat to soften the

Fiber Optic Strippers, Stripping Tools

Specialized Products" selection of fiber optic strippers and cable stripping tools includes various styles of cable strippers to fit your

Stripping & Cutting Tools For Fiber Optic Cable

Ripley professional grade Stripping & Cutting Tools For Fiber Optic Cable feature scribes and cleavers, cable strippers and cutters.

Signal fire Fiber Optic Stripper, 9 in 1 Fiber Optic Stripper Tool ...

The main products are intelligent optical fiber fusion splicer, Signal fire stripper, optical time domain reflectometer (OTDR), light
