

What is Huawei s Smart Power Distribution Box

Overview

Tech giant Huawei unveiled its Intelligent Distribution Solution (IDS) at WEC. Developed with ecosystem partners, IDS leverages cutting-edge technologies to optimise power distribution, enhance grid reliability, and help with integration of renewable sources. IDS is an IoT platform designed to help electric power companies better manage challenges associated with the “last mile”. Technology is providing meaningful solutions, with many organisations showcasing their innovations at World Energy Congress (WEC) in Rotterdam, particularly when it comes to digitisation of the power distribution network. This is especially true when it comes to the 'last mile' distribution to and. BARCELONA, Spain, (ANTARA/PRNewswire)- At the Mobile World Congress 2024, electric power customers and leaders from international organizations gathered to discuss the latest practices and innovations.
